PROFESSIONAL SUMMARY

Dedicated Full Stack Developer with 2 years of experience designing, developing, and deploying highly responsive web and cross-platform mobile applications. Proficient in the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Adept at engineering scalable frontend architectures, building reusable UI components, and integrating robust REST APIs. Proven track record of operating within Agile environments to deliver user-focused, high-performance software solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend & Mobile:** React.js, Next.js, React Native, Advanced DOM Manipulation, Responsive Design
- **Backend & Databases:** Node.js, Express.js, MongoDB, MongoDB Atlas
- **Cloud & Deployment:** AWS (S3), CI/CD, Vercel, Render
- **State Management & Libraries:** Redux Toolkit, Context API, Axios, Recharts
- **AI & API Integrations:** Google Gemini LLM, Prompt Engineering, REST APIs, JWT Authentication
- **Tools & Technologies:** Chrome Extensions (Manifest V3), Vite, Git, GitHub, Postman, Figma, VS Code

WORK EXPERIENCE

Interioverse Design Pvt Ltd
Frontend Developer

MAY 2025 – Present

Real Estate Management Platform | Next.js, React.js, JWT, REST APIs, Recharts,

- Engineered a scalable frontend management system using Next.js and React.js to provide real-time data visibility and centralize platform operations.
- Integrated secure REST APIs with JWT authentication and role-based access to securely manage user subscriptions, designer profiles, and dynamic city-wise pricing models.
- Built a 3D asset and template catalog management module integrated with AWS S3, replacing manual workflows and accelerating quotation generation for designers.
- Developed interactive analytics dashboards utilizing Recharts to track weekly/monthly platform growth and project activity, transforming large datasets into actionable insights for administrative decision-making.

Project Management App | React Native, Redux Toolkit, Axios, OTP Auth

- Developed a scalable, cross-platform mobile application for Android and iOS using React Native, significantly reducing development time by maintaining a single codebase.
- Architected global state management using Redux Toolkit to resolve prop-drilling bottlenecks, improving application performance and data flow.

- Implemented dynamic task handling and real-time progress tracking (percentage-based metrics), enabling managers to assign role-based tasks and monitor team deliverables effectively.
- Integrated secure OTP-based phone authentication and utilized AsyncStorage for reliable local user session management across protected application screens.

PROJECTS

Portfolio Recruiter Chatbot

Personal Project

Full Stack Web Application (Node.js, Express.js, MongoDB Atlas)

- Developed a recruiter-focused chatbot to provide instant, automated information regarding professional skills, work experience, projects, and contact details.
- Built robust REST APIs utilizing Node.js and Express.js, seamlessly integrating with MongoDB Atlas for secure data management.
- Implemented intelligent keyword-based response matching and engineered tracking mechanisms to analyze and manage recruiter interactions.
- Successfully deployed the frontend interface on Vercel and configured the backend for production on Render.
- Designed a highly responsive UI ensuring an optimal user experience across both desktop and mobile devices.

Smart Kirani Application

Personal Project

Mobile App Developer (React Native, Node.js, MongoDB)

- Conceptualized, designed, and developed a comprehensive mobile application aimed at digitizing day-to-step operations for local grocery (kirana) stores.
- Architected secure, multi-role user flows providing distinct navigational structures and access privileges for customers, shop owners, and delivery personnel.
- Programmed core eCommerce functionalities, including dynamic product cataloging, robust cart state management, and streamlined order processing pipelines.

AI-Powered Workday Autofill Extension

Personal Project

React, Manifest V3, Vite, Google Gemini LLM

- Engineered a production-ready Chrome Extension (Manifest V3) using React to automate complex, multi-step enterprise job applications.
- Integrated the Google Gemini LLM to dynamically parse PDF resumes into structured JSON and semantically map candidate data to unknown dropdowns and radio buttons.
- Bypassed strict frontend framework validation by writing content scripts that simulate human keystrokes and dispatch React synthetic DOM events (input, change, blur).
- Designed a robust state-management architecture utilizing background service workers and chrome.storage.local to persist user data across page reloads and tab switches.

EDUCATION

Visvesvaraya Technological University, Belagavi

2021 – 2025

Bachelor of Engineering in Electronics & Communication (ECE) Govt. Engineering College, Haveri
